

## R&D Tax Credit Services

### FOR THE GENERAL CONTRACTING INDUSTRY

The R&D Tax Credit can provide an immediate source of funding as well as a significant reduction to current and future years' federal and state tax liabilities.

#### Examples of general contracting activities and innovations eligible for R&D tax incentives include:

- Means and methods and construction techniques
- Structure and facility design for constructability
- Construction equipment development and improvement
- Design for LEED/green initiatives
- HVAC design
- Electrical system design
- Building Information Modeling (BIM) for sub-system coordination
- Analysis of the functions of a design directed at improving performance, reliability, quality, safety and/or life cycle costs
- Request for Information Process (RFI's)
- Mechanical equipment sizing

#### General Contractor

ANNUAL REVENUE: **\$16** MILLION

\*RESULT: **\$165,000** IN FEDERAL CREDITS

#### General Contractor
